Web Development with HTML and CSS

Introduction

This is a 1-day introductory course that teaches students how to create basic web sites using XHTML and CSS. This hands on course will walk students with basics of creating pages, sites, and adding controls and styles to their web pages.

Audience

This course is intended for anyone who wants to learn how to build a basic website.

Pre-Requisites

Familiarity with the internet, and browsing websites.

Course Format

Black Ninja courses are small by design. This allows for the instructor and students to interact more closely, and gives students opportunity to clarify concepts or raise questions as the training goes on.

Outline

Day	Module	Topic
	1	Overview - Overview of architecture, components, how everything works together
	2	Tools for Web Development
	3	Site Planning and Storyboarding
	4	Creating Your First Page Basic HTML tags
	5	Styling pages with CSS
	6	Site Design Principles
	7	HTML Forms
	8	Launching Your Site - domains, hosting, marketing
	9	Introduction to jQuery

Working Environment

Black Ninja will provide the environment. Students will be using their own VMs when developing their web pages/websites.

Materials

Book and materials will be provided in this class.

Additional materials and resources will be provided as needed.
